

Makeni Prayer Book – Your Catholic Companion

Vision & Product Strategy Document (VPSD)

Project Name: Makeni Prayer Book

Document Version: 1.0

Status: Approved for Product Planning

Author: Product & System Design Team

Last Updated: July 1, 2026

1. Executive Summary

Makeni Prayer Book is a premium, offline-first mobile application designed to become the daily spiritual companion of Catholics around the world, beginning with Sierra Leone.

Rather than simply digitizing a printed prayer and hymn book, the application transforms traditional Catholic resources into a modern, intelligent, beautifully designed reading experience that remains faithful to Catholic teaching while embracing contemporary mobile design and technology.

The application prioritizes simplicity, accessibility, reliability, and spiritual focus.

Internet access should never be a requirement for prayer.

Every user should be able to install the application and immediately access its complete library of prayers and hymns regardless of connectivity.

Cloud services exist only to enhance the experience—not to enable it.

2. Vision Statement

To create the most beautiful, accessible, and spiritually enriching Catholic companion application that helps people pray, worship, learn, and grow closer to God every day through a calm, intelligent, and offline-first digital experience.

3. Mission Statement

Our mission is to remove every technical barrier between people and prayer by delivering a premium Catholic application that is:

- Beautiful to read
- Easy to navigate
- Available completely offline
- Faithful to Catholic tradition
- Accessible to everyone regardless of internet connectivity
- Built to serve both individuals and Catholic communities

4. Product Philosophy

Catholic Companion is guided by seven fundamental principles.

4.1 God Before Technology

Technology should never become the center of the experience.

Prayer remains the primary focus.

Every interface decision should reduce distraction rather than increase engagement for engagement's sake.

The application should encourage reflection, contemplation, and worship.

4.2 Offline First

Every essential feature must function without an internet connection.

Users should never lose access to prayers because of poor connectivity.

Cloud functionality exists only for enhancement.

Examples include:

- Analytics
- Content updates
- Future synchronization
- Notifications
- Remote configuration

Prayer itself must always remain available offline.

4.3 Reading First

The application is fundamentally a premium reading experience.

Typography, spacing, contrast, readability, and navigation are considered more important than decorative visual effects.

Content is the product.

4.4 Calm by Design

Every interaction should communicate peace.

The interface should feel similar to entering a quiet chapel.

Animations should be subtle.

Colors should be restrained.

Whitespace should be embraced.

The application should reduce cognitive load rather than compete for attention.

4.5 Intelligence Without Complexity

The application should feel intelligent while remaining extremely simple.

Examples include:

- Smart recommendations
- Prayer Companion
- Related prayers
- Continue Reading
- Seasonal suggestions

Users should never feel overwhelmed.

4.6 Accessibility for Everyone

The application should be usable by:

- Children
- Elderly users
- New Catholics
- Experienced Catholics
- People with visual impairments
- Users with limited digital literacy

Accessibility is a core design principle, not an afterthought.

4.7 Built for the Future

Version 1 is only the foundation.

The architecture must support future expansion without requiring major redesigns.

Future additions include:

- Bible

- Saints
- Catechism
- Daily Readings
- Liturgical Calendar
- Prayer Journal
- AI-powered assistance
- Parish resources
- Multi-device synchronization

5. Product Identity

Catholic Companion is not:

- A PDF reader
- A document viewer
- A scanned prayer book
- A social media platform
- A gamified religious application

Catholic Companion is:

- A spiritual companion
- A premium reading application
- An offline Catholic library
- A prayer assistant
- A lifelong faith companion

6. Target Audience

Primary Audience

Catholics seeking a reliable daily prayer companion.

Particular emphasis is placed on users in regions with limited internet access, beginning with Sierra Leone.

Secondary Audience

- Choir members
- Students
- Catechists
- Seminarians
- Religious communities
- Parish leaders
- Families
- Teachers

Future Audience

- Catholic schools
- Dioceses
- Mission organizations
- International Catholic communities

7. Core Product Goals

The application should allow users to:

- Read prayers beautifully.
- Read hymns comfortably.
- Find content instantly.
- Pray according to life situations.
- Discover related spiritual resources.
- Continue reading effortlessly.
- Personalize their experience.
- Build long-term spiritual habits.
- Access all essential content offline.

8. Design Principles

Every screen should follow these principles.

Minimalism

Only essential information should be visible.

Avoid unnecessary visual clutter.

Spacious Layout

Generous spacing improves readability and creates a calm atmosphere.

Consistency

Every component should behave predictably.

Navigation patterns should never change unexpectedly.

Simplicity

Every action should require as few steps as possible.

Beauty Through Restraint

The application should avoid excessive decoration.

Its beauty should come from excellent typography, thoughtful spacing, elegant motion, and careful use of color.

9. User Experience Principles

Users should always know:

- Where they are
- What they are reading
- What to do next
- How to return
- How to search
- How to bookmark
- How to continue later

The interface should never require explanation.

10. Content Strategy

The PDF is not the application.

The PDF is the source of truth.

All content will be extracted into structured data.

Each prayer and hymn will become an individual content object enriched with metadata.

This enables:

- Instant search
- Smart recommendations
- Related content
- Prayer Companion
- Personalized experiences
- Future AI features

11. Navigation Philosophy

Users should be able to reach any prayer through multiple paths.

Examples include:

- Search
- Categories
- Table of Contents
- Prayer Companion
- Favorites
- Bookmarks
- Recently Viewed
- Related Content
- Liturgical Season
- Alphabetical Index

No feature should rely exclusively on page numbers.

12. Prayer Companion Philosophy

Prayer Companion represents the heart of the product.

Rather than asking users to know the exact name of a prayer, the application should understand the context of their lives.

Examples include:

- I am anxious.
- I am grateful.
- I need healing.
- I have exams.
- I am travelling.
- I want to pray with my family.
- I need forgiveness.
- I want peace.

The application should respond by recommending appropriate prayers, hymns, reflections, and, in future releases, Bible passages and saints.

Prayer Companion should feel pastoral, supportive, and respectful—never intrusive or prescriptive.

13. Offline Philosophy

The following features must operate entirely offline:

- Prayer library
- Hymn library
- Search
- Categories
- Bookmarks
- Favorites
- Reading history
- Notes
- Collections
- Prayer Companion recommendations
- Reading themes
- Accessibility settings

Internet connectivity should never be required for the core experience.

14. Personalization Philosophy

Personalization should make the application feel familiar without becoming distracting.

Users may customize:

- Reading themes
- Font size
- Line spacing
- Favorite prayers
- Favorite hymns
- Collections
- Bookmarks
- Reading history
- Daily reminders
- Home screen preferences

Personalization exists to support prayer, not to maximize screen time.

15. Success Metrics

The product will be considered successful when users consistently return because the application helps them pray more easily.

Key indicators include:

- Daily active users
- Weekly active users
- Prayer completion rate
- Search success rate
- Bookmark usage
- Favorites usage
- Prayer Companion engagement
- Reading session duration
- Retention after 30, 90, and 180 days
- Crash-free sessions above 99.9%

Analytics should remain anonymous wherever possible.

16. Long-Term Vision

Catholic Companion should grow into a complete Catholic digital ecosystem while preserving its core principles of simplicity, beauty, and accessibility.

Future modules may include:

- Complete Bible
- Daily Mass Readings
- Liturgical Calendar
- Saints
- Catechism
- Novenas
- Rosary guides
- Divine Office
- Parish resources
- Choir tools
- Prayer Journal

- Spiritual reflections
- Optional cloud synchronization
- AI-assisted content discovery

Every future addition must reinforce the application's mission of helping people grow closer to God.

17. Guiding Principle

If a proposed feature makes prayer simpler, more accessible, more beautiful, or more meaningful, it belongs in Catholic Companion.

If a proposed feature distracts from prayer, increases unnecessary complexity, or prioritizes engagement over spiritual purpose, it should not be included.

Closing Statement

Catholic Companion is more than a mobile application.

It is a long-term ministry through technology.

By combining timeless Catholic tradition with thoughtful modern design, the application seeks to place prayer within reach of every person—whether online or offline, at home or on the move, in moments of joy or in times of need.

Every design decision, every line of code, and every feature should ultimately serve one purpose:

To help people encounter God with greater ease, reverence, and consistency through a beautiful digital companion that remains faithful to the life and teachings of the Catholic Church.

7. Information Architecture

7.1 Overview

The information architecture defines how all content within Catholic Companion is organized, related, discovered, and presented.

Unlike a traditional PDF or printed prayer book, Catholic Companion uses a structured content model that allows users to access prayers, hymns, and spiritual resources through multiple intuitive navigation paths.

The architecture is designed around **how people think**, not how pages are printed.

Every prayer, hymn, reflection, saint, or future resource will exist as an independent content object with rich metadata and relationships.

This approach enables:

- Instant Search
- Prayer Companion
- Smart Recommendations
- Related Content
- Seasonal Navigation
- Multiple Browsing Paths
- Personalized Experiences
- Future AI-powered discovery

7.2 Core Navigation Principles

Every piece of content must be reachable through multiple paths.

No user should be forced to remember:

- Page numbers
- Prayer numbers
- Hymn numbers

Instead, users should naturally discover content through categories, recommendations, search, and contextual navigation.

Navigation Goals

The navigation system must be:

- Simple
- Predictable
- Consistent
- Minimal
- Accessible
- Fast
- Offline-first

7.3 Primary Navigation Structure

The application will use a five-tab bottom navigation system.

Home

Prayers

Hymns

Search

Library

Each tab serves a unique purpose.

7.4 Home

Purpose:

Daily spiritual companion.

The Home screen is not a dashboard.

It is a personalized entry point into prayer.

Primary sections include:

- Greeting
- Liturgical Season
- Prayer of the Day
- Continue Reading
- Prayer Companion
- Daily Reflection (Future)
- Saint of the Day (Future)
- Daily Hymn
- Quick Actions
- Recently Opened

7.5 Prayer Library

Purpose:

Explore every prayer.

Users may browse by:

- Category
- Occasion
- Sacrament
- Liturgical Season
- Alphabet
- Book Structure
- Table of Contents

Every prayer remains searchable.

7.6 Hymn Library

Purpose:

Explore all hymns.

Navigation options:

- By Number
- By Title
- By Theme
- By Liturgical Season
- Alphabetical Index
- Recently Sung
- Favorites

Future:

- Choir Collections
- Audio
- Musical Notation

7.7 Search

Search should become the fastest navigation method.

Supported searches:

Prayer title

Prayer keyword

Prayer text

Hymn number

Hymn title

Lyrics

Saint

Occasion

Season

Sacrament

Categories

Collections

Search must return results instantly.

7.8 Library

The Library stores personal content.

Includes:

Bookmarks

Favorites

Collections

Notes

Prayer Journal

Recently Viewed

Reading History

Downloads (Future)

This becomes the user's private spiritual workspace.

8. Content Hierarchy

The application is organized into major modules.

Catholic Companion

└─ Home

└─ Prayer Book

└─ Hymn Book

└─ Prayer Companion

└─ Search

└─ Library

└─ Settings

└─ About

└─ Future Modules

8.1 Prayer Book Structure

Prayer Book

Daily Prayers

Morning

Midday

Evening

Night

Mass

Rosary

Divine Mercy

Novenas

Litanies

Sacraments

Family

Children

Students

Marriage

Healing

Travel

Protection

Thanksgiving

Funeral

Special Occasions

The exact hierarchy will follow the official content of the source prayer book while enriching it with metadata.

8.2 Hymn Structure

Hymns

By Number

By Title

Entrance

Offertory

Communion

Recessional

Marian

Christmas

Easter

Lent

Pentecost

Funeral

Wedding

Youth

General

8.3 Future Modules

Future modules include:

Bible

Saints

Catechism

Daily Readings

Liturgical Calendar

Prayer Requests

Parish Resources

Choir Resources

Catholic Dictionary

Catholic Learning

These modules must integrate seamlessly without changing the core navigation.

9. Navigation Paths

Every prayer should be reachable through multiple independent methods.

Example:

Morning Prayer

Accessible through:

- Home
- Prayer Companion
- Prayer Category
- Daily Prayer
- Search
- Table of Contents
- Favorites
- Bookmarks
- Continue Reading
- Related Content

This redundancy improves discoverability.

10. Table of Contents

The printed table of contents will be preserved.

However, it becomes an interactive navigation tree.

Example:

Prayer Book

▼ Daily Prayers

Morning Prayer

Evening Prayer

Night Prayer

▼ Rosary

Joyful Mysteries

Sorrowful Mysteries

Glorious Mysteries

Luminous Mysteries

▼ Holy Mass

...

Expandable sections.

Fast scrolling.

Searchable.

11. Prayer Companion

Prayer Companion is a guided discovery experience.

Instead of asking:

"What prayer do you want?"

The application asks:

"What are you praying for today?"

Examples:

Peace

Healing

Family

Children

Marriage

Travel

School

Work

Exams

Forgiveness

Hope

Thanksgiving

Grief

Anxiety

Each selection displays curated recommendations.

12. Related Content

Every content object should contain relationships.

Examples:

Morning Prayer

Related:

Prayer Before Work

Prayer Before Study

Angelus

Morning Hymn

Psalm (Future)

Saint of the Day (Future)

These recommendations operate completely offline.

13. Personalized Navigation

The application adapts to user behavior.

Without requiring login.

Examples:

Continue Reading

Frequently Opened

Favorite Categories

Recently Viewed

Most Used Collections

Recommended Prayers

Recommendations remain private unless the user later enables cloud synchronization.

14. Navigation Components

Primary Components:

Bottom Navigation

Search Bar

Floating Search

Breadcrumbs

Expandable Lists

Category Cards

Quick Actions

Related Content Cards

Continue Reading Cards

Section Headers

Persistent Reading Toolbar

Every component must maintain consistent behavior throughout the application.

15. User Flows

Flow 1

Open App

Close App

16. Deep Linking Strategy

Every content object receives a permanent internal identifier.

Example:

prayer://morning-prayer

prayer://angelus

hymn://145

saint://st-joseph

reflection://2026-07-01

Benefits:

Future sharing

Cloud synchronization

Notifications

Search indexing

Recommendation engine

AI integration

17. Information Architecture Principles

Every navigation decision must satisfy the following principles:

Users should never need to know page numbers.

Users should never become lost.

Every prayer should be reachable in multiple ways.

Search should always be faster than browsing.

Browsing should always remain enjoyable.

Navigation should require minimal learning.

The application should feel familiar after only a few minutes of use.

18. Acceptance Criteria

The navigation architecture is considered successful when:

- Any prayer can be reached within three interactions or fewer from the Home screen.
- Search returns relevant results in under 100 milliseconds on supported devices.
- All navigation functions fully offline.
- Users can always identify their current location in the app.
- Every prayer and hymn is accessible through at least three independent navigation methods.
- The printed table of contents is preserved while offering richer digital navigation.
- Personalized navigation (Continue Reading, Favorites, Recent Items) remains available without requiring authentication.
- Future modules can be added without redesigning the primary navigation.

19. Home Experience

19.1 Purpose

The Home screen is the primary entry point into Catholic Companion.

Unlike a dashboard that focuses on data or metrics, the Home screen serves as a spiritual welcome that gently guides users toward prayer and reflection.

It should answer one simple question:

"What would you like to pray today?"

The interface must remain calm, uncluttered, and inviting.

19.2 Goals

The Home screen shall:

- Encourage daily prayer.
- Reduce the time required to find relevant prayers.
- Surface meaningful content based on the liturgical season.
- Remember where the user left off.
- Provide quick access to frequently used content.
- Never overwhelm the user.

19.3 Design Principles

The Home screen shall:

- Use generous whitespace.
- Avoid visual clutter.
- Display only the most relevant information.
- Prioritize readability over decoration.
- Use smooth and subtle animations.
- Load almost instantly.

19.4 Layout

The recommended vertical structure is:

Greeting

Liturgical Season

Prayer of the Day

Continue Reading

Prayer Companion

Today's Hymn

Quick Access

Recent Activity

Explore More

The screen should be vertically scrollable.

Each section is independent and may be shown or hidden depending on available content.

19.5 Greeting Section

Purpose:

Welcome the user naturally.

Examples:

Good Morning

Good Afternoon

Good Evening

The greeting may optionally include:

Current date

Current liturgical season

Current feast day (future)

Example:

Good Morning

Wednesday

Ordinary Time

19.6 Prayer of the Day

This is the most prominent card.

Displays:

Prayer title

Category

Estimated reading time

Short description

Open button

Bookmark button

Favorite button

Refresh recommendation (optional)

Business Rules:

- Changes once every calendar day.
- Works entirely offline.
- Deterministic (same prayer shown all day).
- Can prioritize feast-day prayers when applicable.

19.7 Continue Reading

Purpose:

Resume interrupted reading.

Displays:

Title

Progress indicator

Last opened timestamp

Estimated time remaining

Business Rules:

- Hidden if nothing has been opened.
- Updates automatically.
- Stores locally.

19.8 Prayer Companion Entry

One of the largest interactive cards.

Prompt:

"What are you praying for today?"

Displays common intentions:

❤️ Family

🙏 Thanksgiving

🕊️ Peace

🏥 Healing

🎓 Exams

💼 Work

✈️ Travel

💍 Marriage

😞 Grief

😟 Anxiety

Selecting any intention opens Prayer Companion.

19.9 Today's Hymn

Displays:

Title

Number

Theme

Estimated reading time

Favorite

Bookmark

Open

Future:

Play Audio

19.10 Quick Access

Provides one-touch navigation.

Default shortcuts:

Prayer Book

Hymn Book

Rosary

Bookmarks

Favorites

Search

Users may customize this section in Settings.

19.11 Recently Opened

Displays:

Most recent prayers

Most recent hymns

Most recent reflections

Limited to the last ten items.

19.12 Explore More

Curated recommendations.

Examples:

Morning Prayers

Healing

Lent

Marian Prayers

Christmas

Popular Hymns

Related Collections

Generated locally using metadata.

20. Prayer Companion

20.1 Purpose

Prayer Companion helps users discover appropriate prayers based on their current situation rather than requiring knowledge of prayer names.

It is intended to make prayer approachable for everyone.

20.2 Entry Points

Prayer Companion may be opened from:

Home

Search

Quick Actions

Library

Recommendations

Deep Links (future)

20.3 Initial Screen

Header:

"What are you praying for today?"

Subtitle:

"Choose what is on your heart."

Below is a clean grid of prayer intentions.

20.4 Categories

Minimum launch categories:

Peace

Hope

Healing

Family

Children

Marriage

Work

School

Exams

Travel

Protection

Thanksgiving

Forgiveness

Grief

Strength

Faith

Love

Discernment

Anxiety

Before Sleep

Morning

Evening

Mass

Rosary

Additional categories can be introduced through content updates.

20.5 Recommendation Engine

Recommendations are generated using structured metadata.

Inputs include:

Category

Tags

Liturgical season

Prayer relationships

Recently viewed

Favorites

Time of day

Outputs include:

Recommended prayers

Recommended hymns

Related categories

Future:

Bible passages

Saints

Reflections

20.6 Recommendation Rules

Morning:

Prioritize morning prayers.

Night:

Prioritize evening prayers.

Lent:

Prioritize Lenten prayers.

Christmas:

Prioritize Christmas content.

Easter:

Prioritize Easter prayers.

If no specialized content exists:

Display the best general recommendations.

20.7 Recommendation Cards

Each recommendation displays:

Title

Category

Reading time

Bookmark

Favorite

Short description

Open button

20.8 Related Suggestions

After opening any prayer, show:

Related prayers

Related hymns

Suggested next reading

Future:

Saints

Bible passages

Reflections

20.9 Personalization

Prayer Companion learns locally from:

Frequently opened prayers

Favorite categories

Reading history

Bookmarks

Collections

No internet required.

No account required

20.10 Privacy

Prayer intentions remain private.

No personal prayer requests or selected intentions are transmitted to servers.

Only anonymous aggregate analytics may be collected if analytics are enabled.

20.11 Offline Behavior

Prayer Companion must function entirely offline.

Recommendation logic executes locally using metadata stored within the Isar database.

No network calls are required.

20.12 Future AI Integration

When internet connectivity is available and the feature is enabled, Prayer Companion may offer conversational assistance.

Example queries:

"I need a prayer before surgery."

"What should I pray when I feel anxious?"

"Recommend hymns about hope."

The application shall always distinguish between official Church content and AI-generated assistance.

AI recommendations must never modify or replace the official prayer texts.

21. User Stories

Story 1

As a first-time user,

I want guidance toward meaningful prayers,
so I can begin praying immediately.

Story 2

As a returning user,
I want to continue where I stopped,
so I don't need to search again.

Story 3

As someone experiencing a difficult situation,
I want to select an intention,
so the app recommends appropriate prayers.

Story 4

As an offline user,
I want all recommendations to work,
so poor internet never interrupts prayer.

Story 5

As an elderly user,
I want the Home screen to remain uncluttered,
so I can easily understand where to go.

22. Accessibility Requirements

The Home screen and Prayer Companion shall:

- Support dynamic text scaling.
- Be fully compatible with screen readers.
- Provide large touch targets.
- Maintain sufficient contrast ratios.
- Avoid relying solely on color.
- Support keyboard navigation where applicable.
- Respect reduced-motion preferences.

23. Analytics Events

Anonymous events include:

- Home screen opened
- Prayer of the Day opened
- Continue Reading used
- Prayer Companion opened
- Intention selected
- Recommendation opened
- Today's Hymn opened
- Quick Access used

No prayer text or personal notes are transmitted.

24. Acceptance Criteria

The Home Experience and Prayer Companion are complete when:

- The Home screen loads in under two seconds on supported devices.
- Prayer of the Day updates automatically each day.
- Continue Reading restores the last reading position.
- Prayer Companion functions fully offline.

- Recommendations are generated locally.
- Every recommendation opens the correct content.
- Users can reach a recommended prayer within two taps.
- The interface remains responsive and accessible on all supported screen sizes.
- Personalization remains local unless optional cloud synchronization is enabled in a future release.

Makeni Prayer Book – Your Catholic Companion

Product Requirements Document (PRD)

Version: 1.0

Document Section: Part 4 — Premium Reading Experience

25. Reading Experience

25.1 Overview

The Reading Experience is the core feature of Catholic Companion.

Every design decision shall prioritize:

- Prayer
- Focus
- Readability
- Accessibility
- Peacefulness

The interface should disappear into the background, allowing the prayer or hymn to become the user's sole focus.

The reading experience should feel comparable to premium reading applications such as Kindle and Apple Books while remaining uniquely Catholic in identity.

25.2 Objectives

The Reading Experience shall:

- Maximize readability.
 - Minimize distractions.
 - Support extended reading sessions.
 - Operate completely offline.
 - Feel elegant and effortless.
 - Adapt to different users and accessibility needs.
-

25.3 Reader Layout

The layout shall consist of:

← Back

Prayer Title

Category

Estimated Reading Time

Bookmark

Favorite

More

Prayer Content

Related Content

The layout should emphasize content over interface chrome.

25.4 Reading Header

Displays:

- Prayer or Hymn Title
- Category
- Liturgical Season (when applicable)
- Estimated Reading Time
- Source Page Number
- Book Section

Actions:

- Bookmark
 - Favorite
 - Share
 - More Menu
-

25.5 Reading Body

The reading body shall:

- Support dynamic typography.
- Automatically adjust to accessibility settings.
- Preserve paragraph spacing.
- Preserve formatting from the official text.
- Maintain excellent readability across all screen sizes.

Text shall never appear cramped.

25.6 Reading Footer

After the final paragraph, display:

- Related Prayers
- Related Hymns
- Continue Exploring
- Add Note
- Add to Collection
- Prayer Companion Suggestions

Future:

- Saints
 - Bible References
 - Catechism References
-

26. Typography

Typography is considered a first-class feature.

The application shall use premium typography optimized for long reading sessions.

Requirements:

- Adjustable font size
- Adjustable line spacing
- Adjustable paragraph spacing
- Adjustable page margins
- Adjustable font family (approved options only)

Recommended Themes:

Paper

Sepia

Night Prayer

Cathedral

High Contrast

27. Reader Toolbar

The toolbar shall remain hidden while reading.

It reappears when:

- The screen is tapped.
- The user scrolls upward.
- The user reaches the beginning of the document.

Toolbar actions:

Back

Bookmark

Favorite

Search within Content (future)

Appearance

Share

More

28. Reading Progress

The application shall remember:

Current position

Last opened date

Reading duration

Completion status

Estimated time remaining

Users may optionally reset progress.

Progress is stored locally.

29. Bookmarks

Users shall be able to bookmark:

Entire prayers

Entire hymns

Specific reading positions (future)

Bookmark metadata includes:

Creation date

Title

Category

Page

Last accessed

Bookmarks remain available offline.

30. Favorites

Favorites differ from bookmarks.

Bookmarks:

Temporary navigation.

Favorites:

Long-term personal library.

Users may:

Favorite prayers

Favorite hymns

Favorite collections

Future:

Favorite saints

31. Notes

Every prayer shall support private notes.

Users may create:

Personal reflections

Homily notes

Prayer intentions

Study notes

Each note stores:

Date

Content

Related prayer

Last edited

Future:

Markdown support

Rich text

Attachments

Notes remain private.

32. Highlighting

Users may highlight selected text.

Highlight colors:

Gold

Blue

Green

Pink

Purple

Users may:

Edit highlights

Delete highlights

List all highlights

Search highlights (future)

Highlights are stored locally.

33. Sharing

Users may share:

Prayer title

Prayer text (respecting copyright and configurable limits)

Prayer reference

Deep link (future)

Share targets:

Messaging apps

Email

Social platforms

Copy to clipboard

The shared content shall preserve formatting where possible.

34. Reading Themes

The application shall provide multiple reading themes.

Paper

Warm ivory background.

Dark text.

Optimized for daytime.

Sepia

Soft tan background.

Reduced eye strain.

Optimized for extended reading.

Night Prayer

Dark charcoal background.

Soft white typography.

Designed for evening prayer.

Cathedral

Deep navy surfaces.

Subtle liturgical gold accents.

Premium appearance.

High Contrast

Designed for accessibility.

Maximum readability.

35. Appearance Settings

Users may customize:

Font Size

Font Family

Line Height

Paragraph Spacing

Margins

Theme

Brightness Override (optional)

System Theme Sync

Settings apply immediately.

36. Reading Modes

Normal Reading

Full Screen Reading

Focus Mode

Large Text Mode

Accessibility Mode

Future:

Presentation Mode

Choir Mode

37. Continue Reading

The system shall remember:

Last opened content

Last reading position

Last scroll offset

Last appearance settings

Estimated time remaining

Continue Reading appears on:

Home

Library

Search Results

Prayer Companion

38. Related Content

Every prayer shall display:

Related prayers

Related hymns

Related categories

Suggested collections

Future:

Saints

Bible passages

Catechism

Reflections

Relationships are generated using metadata.

39. Reading Statistics

The application stores anonymous local statistics.

Examples:

Times opened

Reading duration

Completion rate

Bookmark count

Favorite count

Share count

These statistics support personalization.

No statistics identify individual users.

40. Offline Requirements

The Reading Experience must function without:

Internet

Authentication

Cloud synchronization

Every feature except cloud updates must operate offline.

41. Accessibility

The reader shall support:

Dynamic Type

Screen Readers

VoiceOver

TalkBack

Landscape Mode

Large Fonts

High Contrast

Reduced Motion

Large Touch Targets

Semantic Reading Order

WCAG AA compliance

42. Error Handling

If content cannot be loaded:

Display a meaningful message.

Offer Retry.

Log the issue.

Do not crash.

If metadata is unavailable:

Display the prayer text without enhancements.

Graceful degradation is required.

43. Analytics

Anonymous events:

Prayer Opened

Prayer Completed

Bookmark Added

Favorite Added

Highlight Created

Note Created

Theme Changed

Appearance Changed

Share Used

Continue Reading Used

Only anonymous analytics shall be transmitted.

44. User Stories

Story 1

As a user,

I want reading to feel comfortable for long sessions,
so I can focus on prayer.

Story 2

As an elderly user,
I want larger text,
so I can read comfortably.

Story 3

As a returning user,
I want my place remembered,
so I never lose my progress.

Story 4

As a student,
I want to take notes,
so I can remember important reflections.

Story 5

As a choir member,
I want favorite hymns,
so I can quickly access them during practice.

45. Acceptance Criteria

The Reading Experience is complete when:

- Every prayer opens in under 200 milliseconds from the local database.
- Typography adjusts instantly.
- Themes apply without restarting the application.
- Reading position is restored accurately.
- Bookmarks persist across sessions.
- Favorites synchronize locally.
- Notes save automatically.
- Highlights remain attached to the correct content.
- Related content appears for every prayer and hymn with available metadata.
- All functionality operates offline.
- Accessibility requirements pass automated and manual testing.
- The reading interface remains responsive on supported devices.

Makeni Prayer Book – Your Catholic Companion

Product Requirements Document (PRD)

Version: 1.0

Document Section: Part 5 — Prayer Library & Hymn Library

46. Overview

The Prayer Library and Hymn Library are the primary content repositories of Catholic Companion.

They provide structured, intuitive, and offline-first access to all official prayers and hymns contained within the supported Catholic Prayer & Hymn Book while enhancing discoverability through modern navigation, metadata, categorization, and intelligent filtering.

Unlike a printed book, users are never required to know page numbers or hymn numbers to locate content.

47. Objectives

The Prayer Library and Hymn Library shall:

- Organize all content logically.
 - Preserve the structure of the official book.
 - Improve discoverability.
 - Support multiple navigation paths.
 - Operate completely offline.
 - Scale to future content additions without redesign.
-

48. Prayer Library

48.1 Purpose

The Prayer Library provides access to every prayer in the application.

Each prayer shall exist as an independent structured content object rather than a page within a PDF.

48.2 Browsing Methods

Users shall be able to browse prayers by:

- Table of Contents
- Category
- Occasion
- Liturgical Season

- Sacrament
 - Alphabetical Index
 - Recently Viewed
 - Favorites
 - Bookmarks
 - Collections
 - Recommended
 - Prayer Companion recommendations
-

48.3 Categories

Minimum launch categories include:

- Daily Prayers
- Morning Prayers
- Midday Prayers
- Evening Prayers
- Night Prayers
- Holy Mass
- Holy Communion
- Confession
- Rosary
- Divine Mercy
- Novenas
- Litanies
- Marian Prayers
- Eucharistic Prayers
- Family
- Children
- Students
- Teachers
- Marriage
- Healing
- Protection
- Thanksgiving
- Forgiveness
- Travel
- Work
- Exams
- Funeral
- Vocations
- Peace

- Hope
- Faith
- Love

Additional categories shall be supported through future content updates.

48.4 Prayer Detail Card

Each prayer listing shall display:

- Title
- Category
- Estimated Reading Time
- Book Page Number
- Bookmark Indicator
- Favorite Indicator
- Liturgical Season (if applicable)

The list shall remain uncluttered and prioritize readability.

48.5 Prayer Detail View

Opening a prayer shall display:

- Official Title
 - Subtitle (if available)
 - Category
 - Page Number
 - Reading Time
 - Prayer Content
 - Related Prayers
 - Related Hymns
 - Notes
 - Bookmark Action
 - Favorite Action
 - Share Action
-

49. Hymn Library

49.1 Purpose

The Hymn Library provides structured access to all hymns within the official hymn book.

Every hymn shall be stored as structured content rather than static pages.

49.2 Browsing Methods

Users shall browse hymns by:

- Hymn Number
- Alphabetical Title
- First Line
- Theme
- Liturgical Season
- Mass Section
- Recently Viewed
- Favorites
- Collections

Future support:

- Choir Playlists
 - Audio Collections
-

49.3 Hymn Categories

Examples include:

- Entrance
- Offertory
- Communion
- Recessional
- Marian
- Advent
- Christmas

- Lent
- Easter
- Pentecost
- Funeral
- Wedding
- Thanksgiving
- General Worship

The application shall support multiple category assignments for a single hymn.

49.4 Hymn Detail View

Displays:

- Hymn Number
- Title
- Theme
- Page Number
- Estimated Reading Time
- Lyrics
- Related Hymns
- Related Prayers
- Favorite
- Bookmark
- Notes
- Share

Future:

- Audio Playback
 - Musical Notation
 - Choir Mode
-

50. Table of Contents

The official printed table of contents shall be preserved.

Digital enhancements include:

- Expandable sections
- Collapsible sections
- Instant jump navigation
- Search integration
- Alphabetical navigation
- Scroll position memory

The digital structure shall remain faithful to the original publication while improving usability.

51. Alphabetical Index

An alphabetical index shall be available for both prayers and hymns.

Features:

- Sticky alphabet navigation
- Fast scroll
- Instant filtering
- Jump-to-letter functionality

This feature is particularly useful for users who remember titles but not categories.

52. Filtering

Users shall filter content using one or more criteria.

Supported filters include:

- Category
- Liturgical Season
- Sacrament
- Theme
- Favorites
- Bookmarked
- Recently Viewed
- Reading Time
- Alphabetical Order

Filters may be combined.

53. Sorting

Supported sorting options:

- Alphabetical (A–Z)
- Alphabetical (Z–A)
- Book Order
- Recently Opened
- Most Frequently Opened
- Recently Added
- Reading Time

The default sort order shall preserve the official book sequence.

54. Metadata

Every prayer and hymn shall contain structured metadata.

Minimum fields include:

- Unique Identifier
- Official Title
- Subtitle
- Book Page
- Category
- Subcategory
- Tags
- Keywords
- Liturgical Season
- Sacrament
- Reading Time
- Related Content
- Language
- Version
- Source Reference

This metadata powers search, recommendations, and personalization.

55. Relationships

Each content item may define relationships with other content.

Examples:

Morning Prayer

Related To:

- Prayer Before Work
- Angelus
- Morning Hymn
- Thanksgiving Prayer

Relationships shall be bidirectional where appropriate.

56. Performance Requirements

The Prayer Library and Hymn Library shall:

- Open in under one second.
- Scroll smoothly at 60 FPS on supported devices.
- Support thousands of content items without noticeable performance degradation.
- Load all content from the local database.

No internet connection shall be required.

57. Accessibility

The libraries shall support:

- Dynamic text scaling
- Screen readers
- Keyboard navigation (where applicable)

- High-contrast themes
 - Large touch targets
 - Semantic labels for all interactive elements
-

58. Analytics Events

Anonymous events include:

- Prayer Opened
- Hymn Opened
- Category Viewed
- Filter Applied
- Sort Changed
- Table of Contents Used
- Alphabetical Index Used
- Related Content Opened

No prayer text or personal notes shall be transmitted.

59. Business Rules

- Every prayer shall belong to at least one category.
 - Every hymn shall belong to at least one theme.
 - Every content item shall have a unique identifier.
 - Page numbers shall be preserved for reference but shall not be required for navigation.
 - Official text shall never be modified by the application.
 - Related content shall be generated from structured metadata.
 - The application shall gracefully handle future content additions without requiring changes to navigation.
-

60. User Stories

Story 1

As a new user,
I want to browse prayers by category,
so I can discover prayers even if I do not know their titles.

Story 2

As a choir member,
I want to browse hymns by Mass section,
so I can quickly find appropriate hymns.

Story 3

As a returning user,
I want my recently opened prayers available,
so I can continue praying without searching again.

Story 4

As a user without internet,
I want the complete Prayer and Hymn Libraries available,
so my spiritual life is never interrupted by connectivity.

61. Acceptance Criteria

The Prayer Library and Hymn Library are complete when:

- Every official prayer and hymn is represented as structured content.
- All content is fully available offline.
- Users can browse by category, table of contents, alphabetical index, and metadata.

- Filters and sorting operate locally without network access.
- Related content appears consistently where metadata exists.
- The printed structure of the official book is preserved while offering enhanced digital navigation.
- Accessibility requirements are met across supported devices.
- Performance targets are achieved for loading, scrolling, and navigation.

Makeni Prayer Book – Your Catholic Companion

Product Requirements Document (PRD)

Version: 1.0

Document Section: Part 6 — Search & Discovery

62. Overview

The Search & Discovery system enables users to quickly locate prayers, hymns, and future spiritual resources through a fast, intelligent, and entirely offline search experience.

The system shall support users who:

- Know exactly what they are looking for.
- Remember only part of a title.
- Remember a phrase from a prayer.
- Remember a hymn number.
- Want recommendations without searching.
- Want to explore content by topic or spiritual need.

The goal is to ensure that no user is more than a few seconds away from the content they need.

63. Objectives

The Search & Discovery system shall:

- Deliver search results instantly.
 - Operate completely offline.
 - Support full-text search.
 - Support metadata-based discovery.
 - Handle misspellings gracefully.
 - Promote meaningful exploration beyond exact matches.
 - Scale to future content types without redesign.
-

64. Search Entry Points

Users may initiate search from:

- Bottom Navigation
- Home Screen
- Prayer Library
- Hymn Library
- Spiritual Companion
- Continue Reading
- Related Content
- Quick Actions
- Widgets (Future)
- Deep Links (Future)

Search shall always open with focus on the search field.

65. Search Interface

The search interface shall include:

- Search Bar
- Recent Searches

- Suggested Searches
- Popular Categories
- Browse by Topic
- Browse by Liturgical Season
- Browse by Sacrament
- Browse by Occasion

When no search has been entered, the interface acts as a discovery hub.

66. Supported Search Types

The system shall support searching by:

Titles

Example:

Morning Prayer

Partial Titles

Example:

Morning

Full Text

Example:

"Lord make me an instrument"

Hymn Number

Example:

145

Page Number

Example:

212

Keywords

Examples:

Mercy

Hope

Healing

Family

Thanksgiving

Liturgical Season

Examples:

Advent

Christmas

Lent

Easter

Pentecost

Ordinary Time

Sacraments

Examples:

Baptism

Confirmation

Holy Eucharist

Marriage

Holy Orders

Reconciliation

Anointing of the Sick

Categories

Examples:

Rosary

Novenas

Marian

Litanies

Mass

Children

Students

Tags

Examples:

Peace

Faith

Protection

Work

Travel

Grief

Exams

Healing

67. Search Behavior

Search shall begin immediately after the first character is entered.

No search button is required.

Results shall update dynamically as the user types.

Search latency target:

Less than 100 milliseconds on supported devices.

68. Full-Text Search

Every prayer and hymn shall be indexed.

The system shall search:

- Titles
- Subtitles
- Body Text
- Keywords
- Tags
- Metadata
- Categories

Users are not required to know the exact wording.

69. Fuzzy Matching

The search engine shall tolerate:

Misspellings

Missing letters

Extra letters

Letter transpositions

Plural and singular forms

Example:

"Mercy"

"Mercie"

"Merc"

All should return relevant results where appropriate.

70. Synonym Engine

The application shall recognize equivalent concepts.

Examples include:

Holy Mary ↔ Mother of God

Confession ↔ Reconciliation

Mass ↔ Holy Mass

Holy Communion ↔ Eucharist

Travel ↔ Journey

Healing ↔ Recovery

This mapping shall be stored locally and be configurable through future content updates.

71. Search Result Ranking

Results shall be ranked using multiple signals.

Priority order:

1. Exact title match
2. Exact hymn number
3. Exact page number
4. Full-text match
5. Tag relevance
6. Category relevance
7. Related metadata
8. User history
9. Favorites
10. Recently opened

Ranking calculations shall execute locally.

72. Search Result Cards

Each result shall display:

- Title
- Content Type
- Category
- Reading Time
- Page Number
- Liturgical Season (if applicable)
- Matching snippet
- Favorite indicator
- Bookmark indicator

The matching text shall be highlighted.

73. Empty Search State

When no results are found:

Display:

"No matching prayers or hymns were found."

Offer:

- Suggested spelling
- Similar prayers
- Related categories
- Browse by topic
- Spiritual Companion

The user shall never encounter a dead end.

74. Recent Searches

The application shall maintain a local history of recent searches.

Features:

- Maximum of 20 entries.
 - Individual deletion.
 - Clear all.
 - Stored only on the device.
 - Never transmitted unless the user explicitly enables analytics that include search telemetry.
-

75. Discovery Experience

When no query has been entered, the Search screen shall present curated discovery sections.

Examples:

- Daily Prayers
- Popular Hymns
- Marian Devotions
- Rosary
- Advent
- Lent
- Healing
- Family
- Students
- Beginners
- Frequently Used

These sections are generated from metadata and local usage patterns.

76. Contextual Suggestions

While typing, the application shall provide contextual suggestions.

Example:

Input:

"Ros"

Suggestions:

Rosary

Rosary Before Mass

Rosary for Families

Rosary Hymns

Suggestions update in real time.

77. Voice Search (Future)

Future versions may support voice input.

Requirements:

- Optional feature.
- User initiated.
- Device speech recognition APIs.
- Graceful fallback when unavailable.

Voice processing shall respect user privacy.

78. AI-Assisted Search (Future)

When enabled, users may ask natural language questions.

Examples:

"What prayer should I say before an exam?"

"I lost a loved one."

"I need strength today."

The AI shall recommend official content.

The official prayer text shall always remain authoritative.

79. Search Performance

The search engine shall:

- Return initial results in under 100 ms.
- Support libraries containing thousands of content items.
- Maintain smooth scrolling at 60 FPS.
- Operate without network access.
- Minimize memory consumption through indexed local storage.

80. Accessibility

Search shall support:

- Screen readers.
- Dynamic text scaling.
- Keyboard navigation.
- High-contrast themes.
- VoiceOver.
- TalkBack.
- Reduced motion preferences.

All interactive elements shall have semantic labels.

81. Privacy

Search history remains local by default.

The application shall not transmit:

- Search queries
- Prayer intentions
- Personal notes
- Reading history

unless the user explicitly opts into future cloud synchronization features.

82. Analytics Events

Anonymous events include:

- Search Screen Opened
- Query Submitted
- Result Opened
- Suggested Search Selected

- Recent Search Selected
- Filter Applied
- Discovery Section Opened
- Empty Search Encountered

Analytics shall never include prayer text or personal notes.

83. Business Rules

- Every searchable content item shall have indexed metadata.
 - Search shall function without authentication.
 - Search shall function entirely offline.
 - New content shall automatically be indexed during local database updates.
 - Ranking algorithms shall be deterministic for identical inputs.
 - Synonym mappings shall be version-controlled with application content.
-

84. User Stories

Story 1

As a user,

I want to find a prayer by typing only a few words,
so I can access it quickly.

Story 2

As a choir member,

I want to search by hymn number,
so I can locate hymns during Mass preparation.

Story 3

As a new Catholic,

I want to search by topic instead of title,

so I can discover prayers even when I do not know their names.

Story 4

As a user with poor connectivity,

I want search to work completely offline,

so I can rely on the application anywhere.

Story 5

As a returning user,

I want search suggestions based on my recent activity,

so I can reopen frequently used prayers with minimal effort.

85. Acceptance Criteria

The Search & Discovery system is complete when:

- Users can search by title, text, hymn number, page number, category, tag, season, and sacrament.
- Full-text indexing covers all supported prayer and hymn content.
- Fuzzy matching returns relevant results for common spelling errors.
- Synonym mappings improve discoverability without altering official content.
- Results are ranked according to the defined priority rules.
- Search remains fully functional without an internet connection.
- The Search screen provides useful discovery content when no query is entered.
- Accessibility requirements are satisfied across supported platforms.
- Performance targets are achieved for indexing, querying, and rendering results.

67A. Quick Numeric Navigation (Mass Mode)

67A.1 Overview

Catholic worship frequently references prayers and hymns using their official printed numbers or page numbers.

Examples include:

- "Opening Hymn Number 45."
- "Please turn to Hymn 167."
- "Kindly turn to page 214."

The application shall preserve these familiar navigation methods while significantly improving the speed with which users access content.

Quick Numeric Navigation enables users to instantly locate prayers or hymns by entering an official hymn number, prayer number (where applicable), or page number directly into the search interface.

This feature is considered a core navigation mechanism and shall be fully supported offline.

67A.2 Objectives

The Quick Numeric Navigation system shall:

- Preserve the traditional experience of using the printed prayer and hymn book.
 - Reduce the time required to locate content during Mass and other liturgical celebrations.
 - Support users who are familiar with hymn numbers but not titles.
 - Support page-based navigation for users following printed references.
 - Operate entirely offline.
 - Return highly accurate results with minimal user interaction.
-

67A.3 Supported Numeric Searches

The application shall recognize and prioritize the following numeric inputs:

Official Hymn Number

Examples:

45

167

302

The application shall immediately identify these as hymn numbers when a corresponding hymn exists.

Official Prayer Number

If the source publication assigns official prayer numbers, the application shall support direct navigation using those numbers.

Examples:

12

58

104

Printed Book Page Number

Users may search by the printed page number.

Example:

214

The application shall locate all content beginning on or associated with that page.

67A.4 Intelligent Numeric Detection

When the search query contains only numeric characters, the application shall automatically enter **Numeric Navigation Mode**.

Examples:

Input:

45

The application shall first evaluate:

1. Official Hymn Number
2. Official Prayer Number
3. Printed Page Number

before performing a general text search.

This prioritization minimizes unnecessary search results during live worship.

67A.5 Search Priority

When processing numeric queries, results shall be ranked in the following order:

1. Exact Official Hymn Number
2. Exact Official Prayer Number
3. Exact Printed Page Number
4. Related Content
5. General Full-Text Results

Exact numeric matches shall always appear above textual matches.

67A.6 Instant Results

Numeric queries shall return results immediately without requiring the user to submit the search.

Example:

Input:

45

Displayed Result:

- Hymn 45
- Official Title
- Printed Page Number
- Liturgical Theme
- Open Button

Search results shall update dynamically as the user types.

67A.7 Quick Open

If the search query uniquely identifies a single hymn or prayer, the application may provide an optional **Quick Open** action.

Example:

Input:

45

Result:

Open Hymn 45

This allows users to reach the requested hymn with a single tap.

67A.8 Multiple Matches

If the numeric value corresponds to more than one entity, all valid matches shall be displayed with clear labels.

Example:

Input:

45

Results:

Hymn 45

Page 45

Prayer Number 45

Each result shall clearly indicate its content type to eliminate ambiguity.

67A.9 Search Result Card (Numeric)

Numeric search results shall display:

- Official Number
- Official Title
- Content Type
- Printed Page Number
- Liturgical Category
- Estimated Reading Time
- Bookmark Status
- Favorite Status

The official number shall be visually emphasized.

67A.10 Search Field Placeholder

The primary search field shall communicate all supported search methods.

Recommended placeholder:

"Search prayers, hymns, keywords, hymn number, or page..."

Alternative placeholder:

"Search by title, keyword, hymn number, or page..."

This informs first-time users that numeric navigation is available without requiring onboarding.

67A.11 Mass Mode Optimization

Quick Numeric Navigation is specifically optimized for use during Mass.

The system shall:

- Return results in under 100 milliseconds on supported devices.
- Prioritize official hymn numbers.
- Minimize scrolling.
- Require no additional filters.
- Operate completely offline.
- Support rapid repeated searches.

The goal is to enable worshippers to locate a hymn before congregational singing begins.

67A.12 Preservation of Official Numbering

The application shall preserve all official numbering from the approved Catholic Prayer & Hymn Book.

Each content item shall maintain:

- Internal System Identifier
- Official Printed Number
- Printed Page Number
- Structured Content Identifier

The official printed numbering shall never be altered by the application.

67A.13 Metadata Requirements

Every prayer and hymn shall include the following searchable metadata:

- Internal UUID
- Official Printed Number
- Printed Page Number
- Official Title
- Alternate Titles (where applicable)
- First Line (especially for hymns)
- Category
- Liturgical Season
- Theme
- Keywords
- Related Content
- Estimated Reading Time
- Language
- Version

This metadata shall be indexed locally to support high-performance offline search.

67A.14 User Stories

Story 1

As a worshipper,

I want to type the hymn number announced during Mass,

so I can open the correct hymn immediately.

Story 2

As a choir member,

I want hymn numbers to remain identical to the printed book,

so I can follow choir instructions without confusion.

Story 3

As an elderly user,

I want to search using page numbers,

so I can navigate the digital book in the same way I use the printed version.

Story 4

As a first-time user,

I want the search field to indicate that hymn numbers and page numbers are supported,

so I immediately understand how to use the application.

67A.15 Acceptance Criteria

The Quick Numeric Navigation feature is complete when:

- Numeric input is automatically detected.
- Exact hymn number matches are prioritized.
- Official prayer numbers are supported where available.
- Printed page numbers are searchable.
- Results update dynamically without requiring manual submission.
- Users can open a uniquely matched hymn or prayer with a single tap.
- Official numbering remains identical to the printed publication.
- All functionality operates entirely offline.
- Performance targets for offline search are achieved.

Makeni Prayer Book – Your Catholic Companion

Product Requirements Document (PRD)

Version: 1.0

Document Section: Part 7 — My Companion (Personal Workspace)

86. Overview

My Companion is the user's private spiritual workspace within Makeni Prayer Book.

Unlike the Prayer Library and Hymn Library, which contain official content, My Companion stores the user's personal interactions with that content.

It is designed to help users build a consistent prayer life through organization, reflection, and continuity while maintaining complete privacy.

All personal data shall be stored locally by default and remain available without an internet connection.

87. Objectives

The My Companion workspace shall:

- Provide quick access to personal content.
 - Preserve reading continuity.
 - Enable organization of favorite prayers and hymns.
 - Support private spiritual reflection.
 - Encourage consistent engagement without gamification.
 - Respect user privacy by operating offline.
-

88. Navigation Structure

The My Companion workspace shall include the following primary sections:

- Continue Reading
- Favorites
- Bookmarks

- Collections
- Notes
- Prayer Journal
- Reading History
- Spiritual Journey
- Downloads (Future)
- Cloud Sync Status (Future)

Each section shall be accessible through a clean, card-based interface.

89. Continue Reading

Purpose:

Allow users to resume previously opened prayers or hymns without searching.

Each entry shall display:

- Title
- Content Type
- Reading Progress
- Last Opened Date
- Estimated Time Remaining

The application shall automatically update reading progress as the user reads.

90. Favorites

Favorites represent the prayers and hymns the user wishes to access frequently.

Users shall be able to:

- Add or remove favorites.
- Filter by content type.
- Sort alphabetically, by book order, or by recently favorited.
- Search within favorites.

Favorites shall remain available offline.

91. Bookmarks

Bookmarks allow users to quickly return to specific prayers or hymns.

Each bookmark shall include:

- Title
- Official Number (where applicable)
- Printed Page Number
- Date Created
- Last Accessed

Future versions may support bookmarks at specific paragraphs or reading positions.

92. Collections

Collections enable users to organize content into custom groups.

Users may create, rename, and delete collections.

Examples:

- Sunday Mass
- Morning Prayers
- Evening Prayers
- Family Devotions
- Marian Prayers
- Choir Practice
- Lent
- Advent
- Christmas
- Healing
- Before Exams

A prayer or hymn may belong to multiple collections.

93. Notes

Users may create private notes linked to prayers or hymns.

Each note shall include:

- Title (optional)
- Content
- Creation Date
- Last Modified Date
- Linked Content

Notes shall be searchable within My Companion.

94. Prayer Journal

The Prayer Journal provides a dedicated space for personal reflections.

Entries may include:

- Reflection
- Prayer Intention
- Gratitude
- Scripture Reference (Future)
- Linked Prayer or Hymn

Journal entries shall remain private and stored locally.

Future cloud synchronization shall be optional.

95. Reading History

Reading History records recently viewed prayers and hymns.

Users may:

- Reopen previous content.
- Clear individual items.

- Clear all history.
- Disable history recording in Settings.

History shall never be transmitted without explicit user consent.

96. Spiritual Journey

The Spiritual Journey presents a chronological timeline of the user's interaction with the app.

Examples:

- Morning Prayer completed.
- Rosary opened.
- Hymn 145 viewed.
- Prayer Journal entry created.

The timeline is intended to support personal reflection and continuity rather than competition or achievement.

No points, badges, or leaderboards shall be implemented.

97. Privacy

All data within My Companion shall be private by default.

The application shall not upload personal notes, journal entries, favorites, bookmarks, or reading history unless the user explicitly enables future synchronization features.

98. Accessibility

The My Companion workspace shall support:

- Dynamic text scaling.
- Screen readers.
- Keyboard navigation where applicable.

- High-contrast themes.
 - Reduced motion preferences.
 - Large touch targets.
-

99. Business Rules

- Personal data shall remain available offline.
 - Users shall retain full control over deleting their personal data.
 - Collections shall support unlimited items.
 - Notes and journal entries shall be linked to official content without modifying that content.
 - Spiritual Journey entries shall be informational and never used to pressure or rank users.
-

100. User Stories

Story 1

As a regular worshipper,

I want all my favorite prayers in one place,

so I can access them quickly.

Story 2

As a choir member,

I want collections for different liturgical celebrations,

so I can prepare efficiently.

Story 3

As a user,

I want to record personal reflections,

so I can deepen my spiritual life.

Story 4

As someone with limited internet access,

I want my personal workspace to function completely offline,

so I can rely on the app at any time.

101. Acceptance Criteria

The My Companion workspace is complete when:

- Continue Reading restores previous sessions accurately.
- Favorites, bookmarks, collections, notes, and journal entries are fully functional offline.
- Users can organize content into custom collections.
- Reading History behaves according to user preferences.
- Spiritual Journey provides a respectful chronological overview of personal activity.
- All personal data remains private by default.
- Accessibility requirements are satisfied across supported platforms.

Makeni Prayer Book

Catholic Companion

Product Requirements Document (PRD)

Version: 1.0

Document Section: Part 9 — Prayer Reminders & Liturgical Calendar

Feature Summary

Attribute	Value
Module Name	Prayer Reminders & Liturgical Calendar
Module Code	REM
Primary Feature ID	REM-001
Priority	P0 (Core Reminder Engine), P1 (Liturgical Intelligence), P3 (Smart Recommendations)
Technical Complexity	High

Dependencies	Preferences Engine, Local Database, Content Engine, Liturgical Calendar Engine
---------------------	--

Offline Support	Full
------------------------	------

Analytics	Anonymous, Optional
------------------	---------------------

Future Expansion	AI Recommendations, Parish Events, Shared Calendars
-------------------------	---

118. Overview

The Prayer Reminders & Liturgical Calendar module gently assists users in maintaining a consistent prayer life while remaining faithful to the liturgical rhythm of the Catholic Church.

The system shall encourage prayer without creating pressure, guilt, or gamified engagement.

All reminder scheduling and liturgical calculations shall operate offline.

119. Objectives

The module shall:

- Support consistent personal prayer.
 - Respect the liturgical calendar.
 - Allow complete user control over reminders.
 - Minimize interruptions.
 - Operate without internet connectivity.
-

120. Prayer Reminder Engine

Feature ID: REM-001

Priority:  P0

Users shall be able to create reminders for:

- Morning Prayer
- Midday Prayer
- Evening Prayer
- Night Prayer
- Rosary
- Divine Mercy Chaplet
- Novenas
- Personal Prayer
- Sunday Mass Preparation
- Custom Prayer

Each reminder shall allow:

- Time
 - Days of Week
 - Repeat Pattern
 - Notification Sound (optional)
 - Silent Mode
 - Enable/Disable
-

121. Reminder Experience

Reminders shall be:

- Respectful
- Quiet
- Optional
- Easy to dismiss
- Easy to reschedule

Examples:

"Take a quiet moment for Morning Prayer."

"Today is a beautiful day to spend time in prayer."

The wording shall never shame or pressure users.

122. Liturgical Calendar Engine

Feature ID: REM-002

Priority:  P1

The application shall include an offline liturgical calendar engine capable of determining:

- Liturgical Season
- Feast Days
- Solemnities
- Memorials
- Optional Memorials
- Holy Days of Obligation (configurable by region)
- Sundays
- Liturgical Colors

The engine shall calculate dates locally.

123. Seasonal Awareness

The application shall automatically recognize:

- Advent
- Christmas
- Lent
- Easter
- Pentecost
- Ordinary Time

This information shall be made available to:

- Home Screen
- Spiritual Companion
- Search

- Prayer Recommendations
 - Hymn Recommendations
 - Theme Engine
-

124. Feast Day Notifications

Feature ID: REM-003

Priority: ● P1

Users may enable notifications for:

- Major Solemnities
- Feast Days
- Memorials
- Marian Celebrations
- National Patronal Celebrations (future)

These notifications shall be optional.

125. Daily Prayer Suggestions

Feature ID: REM-004

Priority: ● P1

Based on:

- Liturgical Season
- Time of Day
- User Preferences

The application may recommend:

- Relevant Prayers
- Appropriate Hymns
- Novenas
- Marian Devotions

Recommendations shall remain local and private.

126. Quiet Hours

Feature ID: REM-005

Priority:  P0

Users shall define Quiet Hours during which no reminders are delivered.

Default:

10:00 PM – 6:00 AM

Users may customize or disable Quiet Hours.

127. Missed Reminder Handling

If a reminder is missed:

The application shall not repeatedly notify the user.

Instead, it may display a gentle suggestion the next time the application is opened.

No negative messaging shall be used.

128. Reminder History

Users may view:

- Scheduled Reminders
- Completed Reminders (optional)
- Dismissed Reminders

This history is stored locally.

129. Notification Actions

Supported quick actions include:

- Open Prayer
- Snooze
- Mark as Completed
- Dismiss

All actions shall be available directly from the notification where supported by the operating system.

130. Business Rules

- Every reminder is optional.
 - Reminders shall function offline.
 - Quiet Hours always take precedence.
 - Users may disable all reminders.
 - Liturgical calculations shall not depend on an internet connection.
 - Reminder wording shall always be encouraging and respectful.
-

131. Accessibility

The reminder system shall support:

- Screen Readers
 - Dynamic Text
 - Reduced Motion
 - High Contrast
 - Platform Notification Accessibility Features
-

132. Success Metrics

The module is successful when:

- Reminder delivery is reliable while offline.
 - Liturgical dates are calculated accurately.
 - Quiet Hours are consistently respected.
 - Reminder settings persist across application restarts.
 - Users retain complete control over notification frequency.
-

133. User Stories

Story 1

As a working professional,

I want a reminder for Evening Prayer,

so I can maintain my prayer routine.

Story 2

As a parishioner,

I want to know when major feast days occur,

so I can prepare spiritually.

Story 3

As a user,

I want reminders to respect my quiet hours,

so I am never disturbed unexpectedly.

Story 4

As a Catholic with limited internet access,
I want liturgical information to remain available offline,
so I can rely on the application at all times.

134. Acceptance Criteria

The Prayer Reminders & Liturgical Calendar module is complete when:

- Users can create, edit, and delete reminders.
- Quiet Hours are fully respected.
- Reminder notifications function offline.
- The application correctly determines liturgical seasons and major celebrations.
- Seasonal information is available to other modules.
- Users maintain full control over reminder behavior.
- Accessibility requirements are satisfied.

Makeni Prayer Book

Catholic Companion

Product Requirements Document (PRD)

Version: 1.0

Document Section: Part 9 — Prayer Reminders & Liturgical Calendar

Feature Summary

Attribute	Value
Module Name	Prayer Reminders & Liturgical Calendar
Module Code	REM
Primary Feature ID	REM-001
Priority	P0 (Core Reminder Engine), P1 (Liturgical Intelligence), P3 (Smart Recommendations)
Technical Complexity	High
Dependencies	Preferences Engine, Local Database, Content Engine, Liturgical Calendar Engine
Offline Support	Full
Analytics	Anonymous, Optional
Future Expansion	AI Recommendations, Parish Events, Shared Calendars

118. Overview

The Prayer Reminders & Liturgical Calendar module gently assists users in maintaining a consistent prayer life while remaining faithful to the liturgical rhythm of the Catholic Church.

The system shall encourage prayer without creating pressure, guilt, or gamified engagement.

All reminder scheduling and liturgical calculations shall operate offline.

119. Objectives

The module shall:

- Support consistent personal prayer.
 - Respect the liturgical calendar.
 - Allow complete user control over reminders.
 - Minimize interruptions.
 - Operate without internet connectivity.
-

120. Prayer Reminder Engine

Feature ID: REM-001

Priority:  P0

Users shall be able to create reminders for:

- Morning Prayer
- Midday Prayer
- Evening Prayer
- Night Prayer
- Rosary
- Divine Mercy Chaplet
- Novenas
- Personal Prayer
- Sunday Mass Preparation
- Custom Prayer

Each reminder shall allow:

- Time
 - Days of Week
 - Repeat Pattern
 - Notification Sound (optional)
 - Silent Mode
 - Enable/Disable
-

121. Reminder Experience

Reminders shall be:

- Respectful
- Quiet
- Optional
- Easy to dismiss
- Easy to reschedule

Examples:

"Take a quiet moment for Morning Prayer."

"Today is a beautiful day to spend time in prayer."

The wording shall never shame or pressure users.

122. Liturgical Calendar Engine

Feature ID: REM-002

Priority:  P1

The application shall include an offline liturgical calendar engine capable of determining:

- Liturgical Season
- Feast Days
- Solemnities
- Memorials

- Optional Memorials
- Holy Days of Obligation (configurable by region)
- Sundays
- Liturgical Colors

The engine shall calculate dates locally.

123. Seasonal Awareness

The application shall automatically recognize:

- Advent
- Christmas
- Lent
- Easter
- Pentecost
- Ordinary Time

This information shall be made available to:

- Home Screen
 - Spiritual Companion
 - Search
 - Prayer Recommendations
 - Hymn Recommendations
 - Theme Engine
-

124. Feast Day Notifications

Feature ID: REM-003

Priority:  P1

Users may enable notifications for:

- Major Solemnities
- Feast Days
- Memorials
- Marian Celebrations

- National Patronal Celebrations (future)

These notifications shall be optional.

125. Daily Prayer Suggestions

Feature ID: REM-004

Priority: ● P1

Based on:

- Liturgical Season
- Time of Day
- User Preferences

The application may recommend:

- Relevant Prayers
- Appropriate Hymns
- Novenas
- Marian Devotions

Recommendations shall remain local and private.

126. Quiet Hours

Feature ID: REM-005

Priority: ● P0

Users shall define Quiet Hours during which no reminders are delivered.

Default:

10:00 PM – 6:00 AM

Users may customize or disable Quiet Hours.

127. Missed Reminder Handling

If a reminder is missed:

The application shall not repeatedly notify the user.

Instead, it may display a gentle suggestion the next time the application is opened.

No negative messaging shall be used.

128. Reminder History

Users may view:

- Scheduled Reminders
- Completed Reminders (optional)
- Dismissed Reminders

This history is stored locally.

129. Notification Actions

Supported quick actions include:

- Open Prayer
- Snooze
- Mark as Completed
- Dismiss

All actions shall be available directly from the notification where supported by the operating system.

130. Business Rules

- Every reminder is optional.
 - Reminders shall function offline.
 - Quiet Hours always take precedence.
 - Users may disable all reminders.
 - Liturgical calculations shall not depend on an internet connection.
 - Reminder wording shall always be encouraging and respectful.
-

131. Accessibility

The reminder system shall support:

- Screen Readers
 - Dynamic Text
 - Reduced Motion
 - High Contrast
 - Platform Notification Accessibility Features
-

132. Success Metrics

The module is successful when:

- Reminder delivery is reliable while offline.
 - Liturgical dates are calculated accurately.
 - Quiet Hours are consistently respected.
 - Reminder settings persist across application restarts.
 - Users retain complete control over notification frequency.
-

133. User Stories

Story 1

As a working professional,

I want a reminder for Evening Prayer,

so I can maintain my prayer routine.

Story 2

As a parishioner,

I want to know when major feast days occur,

so I can prepare spiritually.

Story 3

As a user,

I want reminders to respect my quiet hours,

so I am never disturbed unexpectedly.

Story 4

As a Catholic with limited internet access,

I want liturgical information to remain available offline,

so I can rely on the application at all times.

134. Acceptance Criteria

The Prayer Reminders & Liturgical Calendar module is complete when:

- Users can create, edit, and delete reminders.
- Quiet Hours are fully respected.
- Reminder notifications function offline.
- The application correctly determines liturgical seasons and major celebrations.
- Seasonal information is available to other modules.
- Users maintain full control over reminder behavior.
- Accessibility requirements are satisfied.

Makeni Prayer Book

Catholic Companion

Product Requirements Document (PRD)

Version: 1.0

Document Section: Part 11 — Accessibility & Inclusive Design

Feature Summary

Attribute	Value
Module Name	Accessibility & Inclusive Design
Module Code	ACC
Primary Feature ID	ACC-001
Priority	P0 (Core Accessibility), P1 (Enhanced Accessibility Modes), P3 (Advanced Assistive Features)
Technical Complexity	Medium

Dependencies	Theme Engine, Reading Engine, Settings Module, Flutter Accessibility APIs
---------------------	---

Offline Support	Full
------------------------	------

Analytics	None Required
------------------	---------------

Future Expansion	Voice Navigation, Audio Reading, AI Accessibility Assistance
-------------------------	--

154. Overview

Accessibility is a core product principle of Makeni Prayer Book.

The application shall be designed to ensure that people of all ages, abilities, and levels of digital literacy can comfortably read, search, and navigate prayers and hymns.

Accessibility shall never be treated as an optional enhancement.

155. Objectives

The Accessibility module shall:

- Support users with visual, motor, and cognitive challenges.
 - Improve readability for all users.
 - Provide consistent navigation patterns.
 - Minimize unnecessary complexity.
 - Respect platform accessibility settings.
-

156. Dynamic Typography

Feature ID: ACC-001

Priority:  P0

Users shall be able to:

- Increase font size.
- Decrease font size.
- Adjust line spacing.
- Improve paragraph spacing.
- Increase reading width where appropriate.

Typography changes shall update immediately across the application.

157. High Contrast Support

Feature ID: ACC-002

Priority:  P0

The application shall support:

- High Contrast Light Theme.
- High Contrast Dark Theme.
- Platform accessibility contrast settings.

Color shall never be the sole indicator of meaning.

158. Screen Reader Support

Feature ID: ACC-003

Priority:  P0

All interactive components shall include descriptive accessibility labels.

The application shall fully support:

- Android TalkBack.
- iOS VoiceOver.

Reading order shall remain logical throughout the application.

159. Touch Accessibility

Feature ID: ACC-004

Priority:  P0

Interactive elements shall:

- Meet recommended minimum touch target sizes.
- Maintain adequate spacing.
- Avoid accidental activation.

Gestures shall always have accessible alternatives.

160. Elder Mode

Feature ID: ACC-005

Priority:  P1

Elder Mode shall provide:

- Larger fonts.
- Larger icons.
- Larger touch targets.
- Increased spacing.
- Simplified layouts.
- Reduced animations.
- Persistent Quick Jump.
- Enhanced hymn number visibility.

The mode shall be enabled with a single setting.

161. Choir Mode

Feature ID: ACC-006

Priority: ● P1

Choir Mode shall optimize the application for hymn usage by:

- Highlighting hymn numbers.
 - Displaying larger lyrics.
 - Minimizing interface controls.
 - Preventing screen sleep while active.
 - Supporting landscape orientation.
-

162. Reduced Motion

Feature ID: ACC-007

Priority: ● P0

The application shall respect system preferences for reduced motion.

Animations shall remain subtle and never interfere with reading.

163. Keyboard & External Device Support

Feature ID: ACC-008

Priority: ● P1

Where supported by the platform, users shall be able to navigate using:

- Physical keyboards.
- Bluetooth keyboards.
- Directional controls.

This supports tablet users and accessibility devices.

164. Language Simplicity

Feature ID: ACC-009

Priority:  P0

Application interface text shall be:

- Clear.
- Concise.
- Consistent.
- Easy to understand.

Technical terminology shall be avoided where possible.

165. Offline Accessibility

Accessibility features shall remain fully functional without internet connectivity.

166. Success Metrics

The Accessibility module is successful when:

- Users can comfortably read content across supported font sizes.
 - Screen readers correctly interpret the interface.
 - Elder Mode and Choir Mode provide meaningful improvements.
 - High contrast themes remain readable.
 - Accessibility settings persist across application restarts.
-

167. Business Rules

- Accessibility features shall not require internet connectivity.
 - All new interface components shall include accessibility labels.
 - User-selected accessibility preferences shall be preserved.
 - Accessibility shall be considered during every future feature addition.
-

168. User Stories

Story 1

As an elderly parishioner,
I want larger text and simplified navigation,
so I can comfortably use the application during Mass.

Story 2

As a visually impaired user,
I want screen reader support,
so I can access prayers independently.

Story 3

As a choir member,
I want an optimized hymn display,
so I can follow hymns easily during rehearsals and liturgical celebrations.

Story 4

As a user with limited digital experience,
I want a simple and consistent interface,
so I can navigate confidently.

169. Acceptance Criteria

The Accessibility & Inclusive Design module is complete when:

- Dynamic typography functions across the application.
- Screen readers correctly identify interactive elements.
- High contrast themes are supported.
- Elder Mode and Choir Mode operate as designed.
- Reduced motion settings are respected.
- Accessibility preferences persist across sessions.
- The application remains fully usable offline.

Makeni Prayer Book

Catholic Companion

Product Requirements Document (PRD)

Version: 1.0

Document Section: Part 13 — Non-Functional Requirements & Quality Attributes

Feature Summary

Attribute	Value
Module Name	Non-Functional Requirements
Module Code	NFR
Primary Feature ID	NFR-001
Priority	P0
Technical Complexity	High
Dependencies	Entire Platform
Offline Support	Mandatory
Analytics	Anonymous, Optional
Future Expansion	All Future Modules

184. Overview

The Non-Functional Requirements define the quality standards that Makeni Prayer Book must satisfy.

These requirements apply to every module within the application and establish measurable expectations for performance, reliability, maintainability, accessibility, security, and user experience.

185. Quality Attributes

The application shall satisfy the following quality attributes:

- Performance
- Reliability
- Offline Availability
- Accessibility
- Maintainability
- Security
- Privacy
- Extensibility
- Portability
- Scalability
- Usability

These attributes shall guide all technical and architectural decisions.

186. Performance Requirements

Feature ID: NFR-001

Priority:  P0

Target performance metrics:

Operation	Target
Cold Application Startup	Less than 2 seconds
Warm Startup	Less than 1 second
Open Prayer	Less than 150 ms
Open Hymn	Less than 150 ms
Quick Jump Search	Less than 80 ms
Full Search Response	Less than 100 ms
Theme Switching	Less than 100 ms
Bookmark Creation	Instant
Favorite Toggle	Instant

Performance shall be measured on supported reference devices.

187. Reliability

Feature ID: NFR-002

Priority: ● P0

The application shall:

- Recover gracefully from unexpected failures.
 - Preserve user-generated content.
 - Prevent data corruption.
 - Continue operating during network loss.
 - Protect content during updates.
-

188. Offline Availability

Feature ID: NFR-003

Priority: ● P0

Core features shall remain fully operational without internet connectivity.

Offline functionality includes:

- Reading
 - Search
 - Quick Jump
 - Favorites
 - Bookmarks
 - Notes
 - Prayer Journal
 - Collections
 - Reminder Scheduling
 - Liturgical Calendar
 - Accessibility Features
-

189. Scalability

Feature ID: NFR-004

Priority: ● P1

The architecture shall support future expansion to include:

- Additional Prayer Books
- Bible
- Catechism
- Saints
- Daily Readings
- Reflections
- Multiple Languages
- Regional Editions

without requiring architectural redesign.

190. Maintainability

Feature ID: NFR-005

Priority:  P0

The application shall use a modular architecture with clearly separated responsibilities to simplify maintenance, testing, and future enhancements.

191. Battery Efficiency

Feature ID: NFR-006

Priority:  P0

The application shall:

- Avoid unnecessary background processing.
- Minimize wake events.
- Avoid continuous network polling.
- Suspend non-essential work while idle.

Normal reading sessions shall have minimal impact on battery life.

192. Storage Efficiency

Feature ID: NFR-007

Priority:  P1

Target installation size:

Less than 100 MB (excluding future optional content packs).

The application shall optimize local storage through efficient indexing and structured content management.

193. Portability

Feature ID: NFR-008

Priority:  P1

Supported platforms for Version 1:

- Android
- iOS

Future platforms:

- Web
- Windows
- macOS

The Flutter codebase shall maximize code reuse across supported platforms.

194. Security Quality

Feature ID: NFR-009

Priority:  P0

The application shall protect:

- Official content.
 - User-generated data.
 - Content updates.
 - Local storage integrity.
-

195. Accessibility Quality

Feature ID: NFR-010

Priority:  P0

All interface components shall conform to the Accessibility & Inclusive Design requirements defined in Part 11.

196. Usability

Feature ID: NFR-011

Priority:  P0

The application shall:

- Minimize cognitive load.
 - Maintain consistent navigation.
 - Preserve visual simplicity.
 - Prioritize prayer and hymn content.
 - Reduce unnecessary user actions.
-

197. Success Metrics

The platform shall:

- Meet all defined performance budgets.
- Maintain stable offline operation.
- Preserve user data across updates.

- Scale to future content without redesign.
 - Achieve consistent behavior across supported devices.
-

198. Business Rules

- Performance budgets shall be considered mandatory engineering targets.
 - New features shall not compromise offline functionality.
 - Platform quality shall take precedence over adding low-value features.
 - Every release shall satisfy the defined quality attributes before publication.
-

199. Acceptance Criteria

The Non-Functional Requirements are satisfied when:

- Performance targets are consistently achieved.
- Offline operation remains reliable.
- Battery consumption is minimal during typical use.
- The application scales to additional content packages.
- User experience remains consistent across supported platforms.
- All quality attributes are demonstrably met during testing.

Makeni Prayer Book

Catholic Companion

Product Requirements Document (PRD)

Version: 1.0

Feature Summary

Attribute	Value
Module Name	MVP Scope & Release Strategy
Module Code	REL
Primary Feature ID	REL-001
Priority	P0
Technical Complexity	Medium
Dependencies	Entire Product
Offline Support	Mandatory
Future Expansion	Product Roadmap

200. Overview

This section defines the scope of each planned product release.

Its purpose is to ensure that development remains focused, manageable, and aligned with the product vision while delivering meaningful value at every stage.

201. Product Release Philosophy

The product shall evolve through clearly defined releases:

- **Version 1.0 — Foundation**
- **Version 1.5 — Companion**
- **Version 2.0 — Intelligence**
- **Version 3.0 — Connected Church**

Each release shall build upon the previous one without compromising stability or user trust.

202. Version 1.0 — Foundation (MVP)

Goal: Deliver a complete, reliable, offline-first digital Makeni Prayer Book.

Included Features (● P0)

- Structured Prayer & Hymn Library
- Premium Reading Experience
- Offline Reading
- Quick Numeric Navigation
- Full-Text Search
- Prayer & Hymn Search
- Home Dashboard
- Spiritual Companion (Core)
- Favorites
- Bookmarks
- Continue Reading
- Reading History
- Settings

- Theme Support (Light/Dark/System)
 - Typography Controls
 - Prayer Reminders
 - Liturgical Calendar (Core)
 - Accessibility Features
 - Privacy Controls
 - Offline Architecture
 - Security & Content Integrity
-

203. Version 1.5 — Companion (MLP)

Goal: Deepen the personal spiritual experience.

Included Features (🟡 P1)

- Prayer Journal
 - Notes
 - Collections
 - Reading Profiles
 - Elder Mode
 - Choir Mode
 - Liturgical Theme Engine
 - Personalized Recommendations
 - Privacy Center
 - Export Personal Data
 - Content Updates
 - Enhanced Reminder Experience
-

204. Version 2.0 — Intelligence

Goal: Introduce intelligent assistance while preserving Church teaching.

Included Features

- AI Prayer Companion
- Bible Integration
- Saints

- Catechism
 - Daily Readings
 - Cross References
 - Advanced Recommendation Engine
 - Multiple Languages
 - Additional Prayer Book Editions
-

205. Version 3.0 — Connected Church

Goal: Extend the platform with optional connected services.

Included Features

- Optional Cloud Sync
- Multi-device Synchronization
- Parish Event Integration
- Parish Announcements (Optional)
- Shared Collections (Optional)
- Secure User Accounts (Optional)
- Backup & Restore

Core prayer functionality shall remain available without an account.

206. Minimum Lovable Product (MLP)

The Minimum Lovable Product extends the MVP by introducing features that encourage long-term engagement while remaining faithful to the design philosophy.

These include:

- Prayer Journal
 - Collections
 - Reading Profiles
 - Liturgical Themes
 - Personalized Recommendations
-

207. Out of Scope for Version 1.0

The following features shall not be included in the initial public release:

- Social Media
 - Public Comments
 - Public Prayer Sharing
 - Chat
 - Advertisements
 - Mandatory Registration
 - Online-only Features
 - Gamification
 - Badges
 - Leaderboards
 - Cloud Synchronization
 - AI Features
-

208. Launch Success Metrics

Version 1.0 shall be considered successful when:

- Application startup meets performance targets.
 - Offline functionality is complete.
 - Search meets response time targets.
 - Crash-free sessions exceed target reliability.
 - User data remains intact after updates.
 - Official content integrity is preserved.
 - Accessibility requirements are satisfied.
-

209. Business Rules

- P0 features must be completed before public release.
 - P1 features shall not delay Version 1.0.
 - Future features shall not compromise the offline-first philosophy.
 - User trust shall always take precedence over feature quantity.
-

210. Acceptance Criteria

The MVP Scope & Release Strategy is complete when:

- All P0 requirements are delivered.
- Release boundaries are clearly documented.
- Deferred functionality is explicitly identified.
- Product vision remains aligned across future releases.

Makeni Prayer Book

Catholic Companion

Product Requirements Document (PRD)

Version: 1.0

Document Section: Part 15 — Product Evolution Strategy

Feature Summary

Attribute	Value
Module Name	Product Evolution Strategy
Module Code	EVO

Primary Purpose Long-Term Product Direction

Priority Strategic

Scope Entire Platform

Applies To All Current and Future
Releases

211. Overview

This Product Evolution Strategy defines the long-term direction of Makeni Prayer Book: Catholic Companion.

It provides a shared vision for how the platform will evolve while preserving its core principles of faithfulness, simplicity, privacy, accessibility, and offline-first functionality.

212. North Star

Mission Statement

To make authentic Catholic prayer and worship accessible to everyone, anywhere, anytime—even without internet access.

This mission shall guide all product and engineering decisions.

213. Product Vision

Makeni Prayer Book: Catholic Companion is a premium, offline-first Catholic reading platform that transforms the traditional Makeni Prayer Book into a modern digital spiritual companion while preserving the authenticity, simplicity, and reverence of the printed edition.

214. Product Values

The platform shall uphold the following values:

- Faithfulness
- Sacred Simplicity
- Accessibility
- Privacy
- Reliability
- Beauty
- Excellence

These values shall remain consistent across all future releases.

215. Product Evolution Phases

Phase 1 — Digital Prayer Book

Deliver a modern, offline-first digital edition of the Makeni Prayer Book with premium reading, search, and navigation.

Phase 2 — Catholic Companion

Enhance the personal prayer experience through:

- Prayer Journal
- Collections
- Reading Profiles
- Spiritual Companion
- Personalized Recommendations
- Liturgical Themes

Phase 3 — Catholic Knowledge Platform

Expand the platform with:

- Bible Integration
- Saints
- Catechism
- Daily Readings
- Devotional Guides
- Cross References

Phase 4 — Catholic Digital Ecosystem

Enable optional connected services, including:

- Cloud Synchronization
- Multi-device Support
- Parish Integration
- Educational Resources
- Multi-language Content
- AI Prayer Companion (Optional and Clearly Identified)

Core prayer functionality shall always remain available offline.

216. Strategic Goals

The long-term objectives of the platform are to:

- Preserve authentic Catholic resources.
 - Increase accessibility to prayer materials.
 - Support spiritual growth.
 - Maintain user trust through privacy.
 - Provide a sustainable platform for future expansion.
-

217. Product Success Principles

Every future feature shall satisfy the following questions:

- Does it help people pray?
- Does it respect Catholic teaching?
- Does it work offline?
- Is it simple to use?
- Is it accessible?
- Is it performant?
- Does it protect privacy?
- Does it contribute meaningful value?

Features failing these principles should be redesigned or deferred.

218. Long-Term Success Metrics

The platform aims to achieve:

- High user trust through transparent privacy practices.
 - Reliable offline functionality.
 - Sustainable architectural scalability.
 - Strong accessibility compliance.
 - High user satisfaction.
 - Continued expansion through structured content packages.
-

219. Governance

Future product decisions shall align with:

- Product Vision.
- Product Values.
- Trust Principles.
- Design Philosophy.
- Architecture Decision Records.
- Privacy Charter.

No future enhancement shall compromise these foundational commitments.

220. Closing Statement

Makeni Prayer Book: Catholic Companion is more than a digital publication.

It is a long-term platform dedicated to preserving and enriching Catholic prayer, worship, and spiritual formation through thoughtful technology.

Every release shall strive to honor the traditions of the Church while embracing innovation that genuinely serves its users.

The platform shall evolve with care, ensuring that technology remains a servant to faith rather than a distraction from it.
